PHILOSOPHY

The Cercle Investor Relations Austria was founded in autumn 1991 and is anchored in the parent organization of the International Investor Relations Federation.

C.I.R.A. is an interest group of publicly traded companies. It currently has 63 regular and 15 associate members.

C.I.R.A. views itself as a reform movement, which is supported by its member companies as a form of self-help group. Its goal is to continuously improve Investor Relations.

C.I.R.A. provides its members with a round-table for the discussion of ideas and exchange of information. These activities are designed to improve the quality of relations with investors in Austria and other countries.

Active and professional Investor Relations on a wide-ranging basis improve the image of Austria as a financial market. Only this can guarantee optimal access to capital for each and every company.
